

TRADITIONAL LIME:SAND

CEMEX Mortar's traditional lime:sand is convenient, simple to use and extremely effective. A versatile solution, lime:sand mortars are easy to obtain in a variety of colours and shades, and can be stored indefinitely.

- **Carefully controlled blend conforms to British and European Standard specifications**
- **Improved workability effectively reduces wastage on site**
- **Offers excellent weathering characteristics**

Excellent workability

Lime based mortars retain water very effectively so remain workable for long periods. They also provide an improved bond, enhancing the properties of your masonry.

Extreme durability

CEMEX Mortar's traditional lime:sand promotes greater durability of the bond and joint, which can significantly reduce maintenance of the finished brickwork. Lime mortars have been in use for thousands of years, with many examples of their durability and longevity still in existence today.

Working to suit you

CEMEX Mortar's traditional lime:sand is perfect for small projects thanks to simplicity of use and a long working life. If you prefer part loads, we can also arrange affordable delivery for you, wherever you are in Great Britain.

Reliable quality

CEMEX Mortars use only high quality factory blended sands that have been correctly graded and tested for conformity to both British and European Standards and internal specifications.

Mortar Designation	Nominal proportions by volume	Compressive strength 28 days Not less than N/mm ²
i	1:3	12.0
ii	1:3-4	6.0
iii	1:5-6	4.0
iv	1:7-8	2.0
